

Keith Hastie, 60 Schoolhouse Road

I have been committed to public service since high school, including a summer position with the National Park Service, 22 years in the U.S. Navy and Naval Reserves, and 24 years with the U.S. Fish and Wildlife Service. I hold a BS degree in Natural Resource Management and Planning (University of West Florida, Pensacola) and a MS degree in Environmental Science (Indiana University, Bloomington). If elected to the Planning Board I commit to working hard to ensure our zoning bylaw reflects the interests of our residents and that its provisions are applied objectively and lawfully. I have no affiliation with any individual, business, industry group, or other special interest organization that might want to influence Town policies or regulatory outcomes.
