

Record Storage Advisory Committee

On 10/16/19 The Record Storage Advisory Committee reported its findings to the Select Board after two years of research and discussion. Currently our town's records are being stored under conditions that make them inaccessible, likely to deteriorate and mold, and take up much needed office space. We were prepared to bring photographs to this Town Meeting to illustrate the problems with record storage in Shutesbury.

The committee created a chart of possibilities and measured them according to record storage criteria. While we did not recommend a specific solution, the report, as a result of our investigation and discussion, provides a starting place for informed discussion and investment in our stewardship of Shutesbury's records. The report and chart can be found on the Record Storage Advisory Committee's web page: <https://www.shutesbury.org/node/1431>

Respectfully,

Susie Mosher - Chair of the Record Storage Advisory Committee
