678 Pratt Corner Rd
Shutesbury, MA 01072

Dear Commission:

The following is a description of work at the above address to remove, dead, leaning, and rotten trees. This request comes after multiple trees falling on and around the residence. The property owner and the contractor met with the Conservation Committee on site a couple months ago. During the site visit the Chair of the committee recommended filling out this application to complete this work.

- Before, during and after proposed work ConCom is welcome on site anytime.
- Call National Grid to disconnect power to the residence once a permit is issued.
- Drop trees in a safe and controlled manner. The contractor and homeowner understands trying their best to not disturb wetlands, vegetation, etc.
- Trees to be cut and chipped. Wood chips to remain onsite per ConCom or removed off site if necessary. Homeowner is open to whatever ConCom suggests.
- Homeowner to replant native tree species (such as Red Maple, Oak) equal to the amount of trees permitted to take down. Trees to be planted within 8' of existing tree that is to be removed.

Thank you for your time on this matter,

T. Jake Mitchell
